Would the chart of comments and responses be good enough to cross reference to a change ECAD wants so we can have a logical outgrowth argument for the change?

- We have a couple of questions on the new entrainment monitoring and sampling requirements. We just want to make sure we understand how to enforce this new requirements.

Thank you again! Let us know if you need anything else during the next few step to finalizing the permit.

This is the most recent final version of the permit. Still have to brief RA before we can send to OMB for significance determination, so there may be some additional changes that will be shared separately. Changes are tracked.
